

GNOT Public Sale - Test Sign-up Guide

How to register as a NEW test user on the staging site, pass the sandbox verification with Overrides, and reach the bidding step.

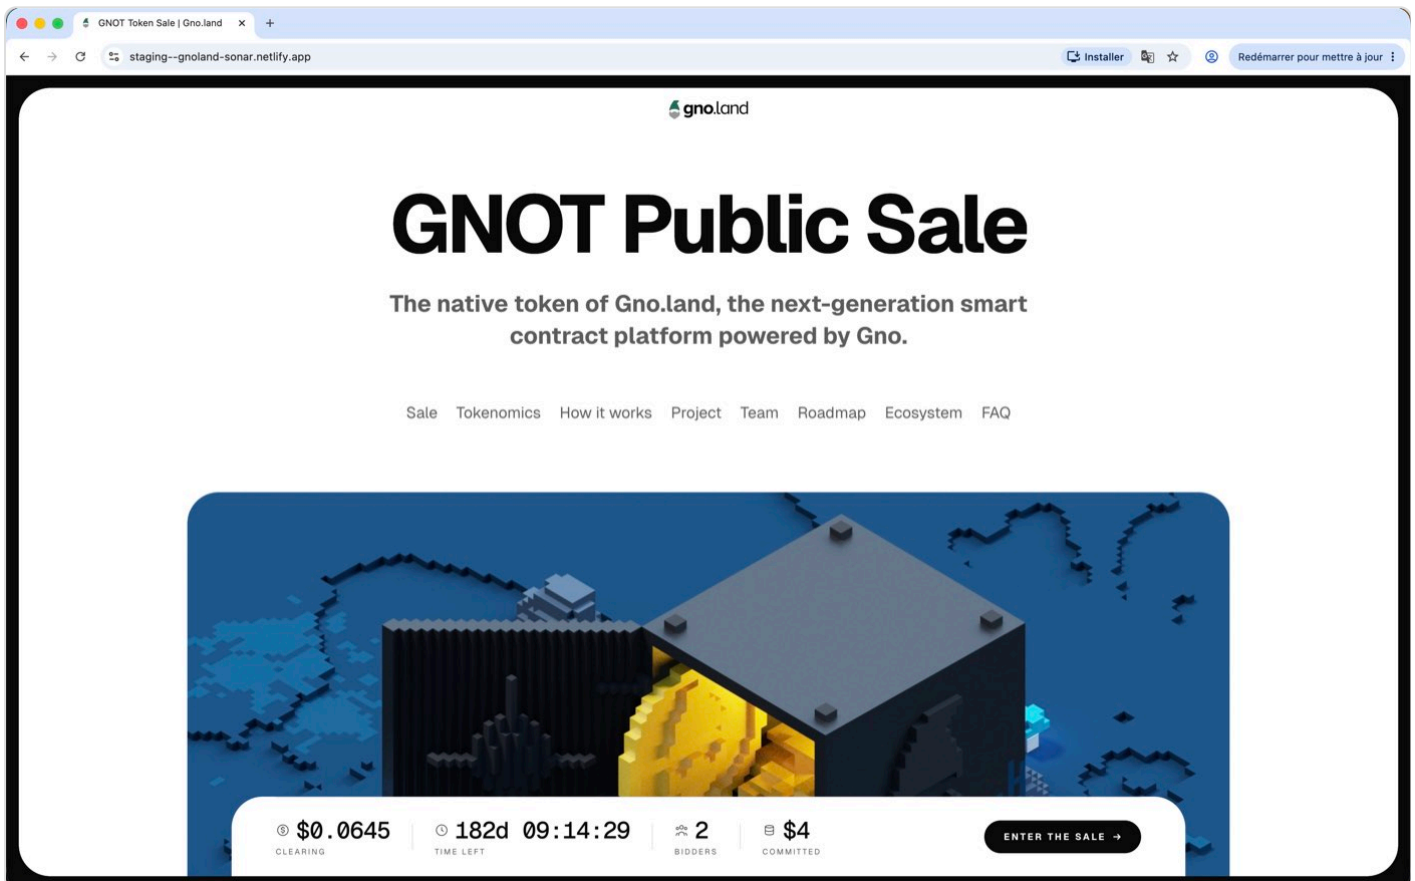

Environment: **staging** (Sonar sandbox + Sepolia) | Site: <https://staging--gnoland-sonar.netlify.app> | Desktop browser only (Chrome recommended) | July 2026

Before you start

This is a TEST sale on Sonar's sandbox: no real KYC is needed. Verification is granted through the sandbox "Overrides" panel (step 11). You need an email address you can access, and MetaMask installed for the final bidding steps (Keplr has a known gas bug on this flow - use MetaMask).

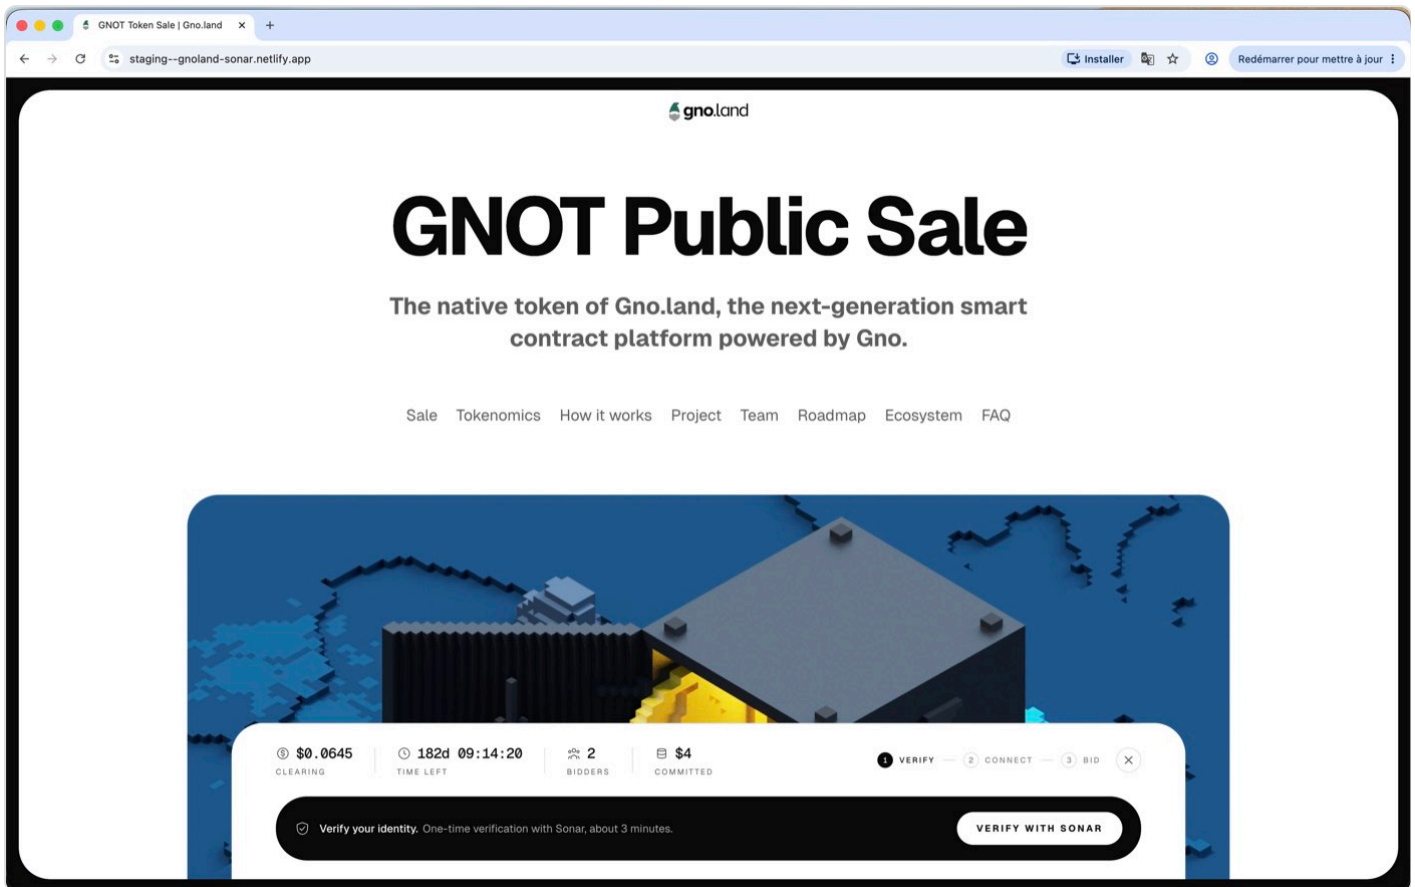

1 Open the staging site and enter the sale

Go to <https://staging--gnoland-sonar.netlify.app> and click **ENTER THE SALE** in the white bar at the bottom of the hero.

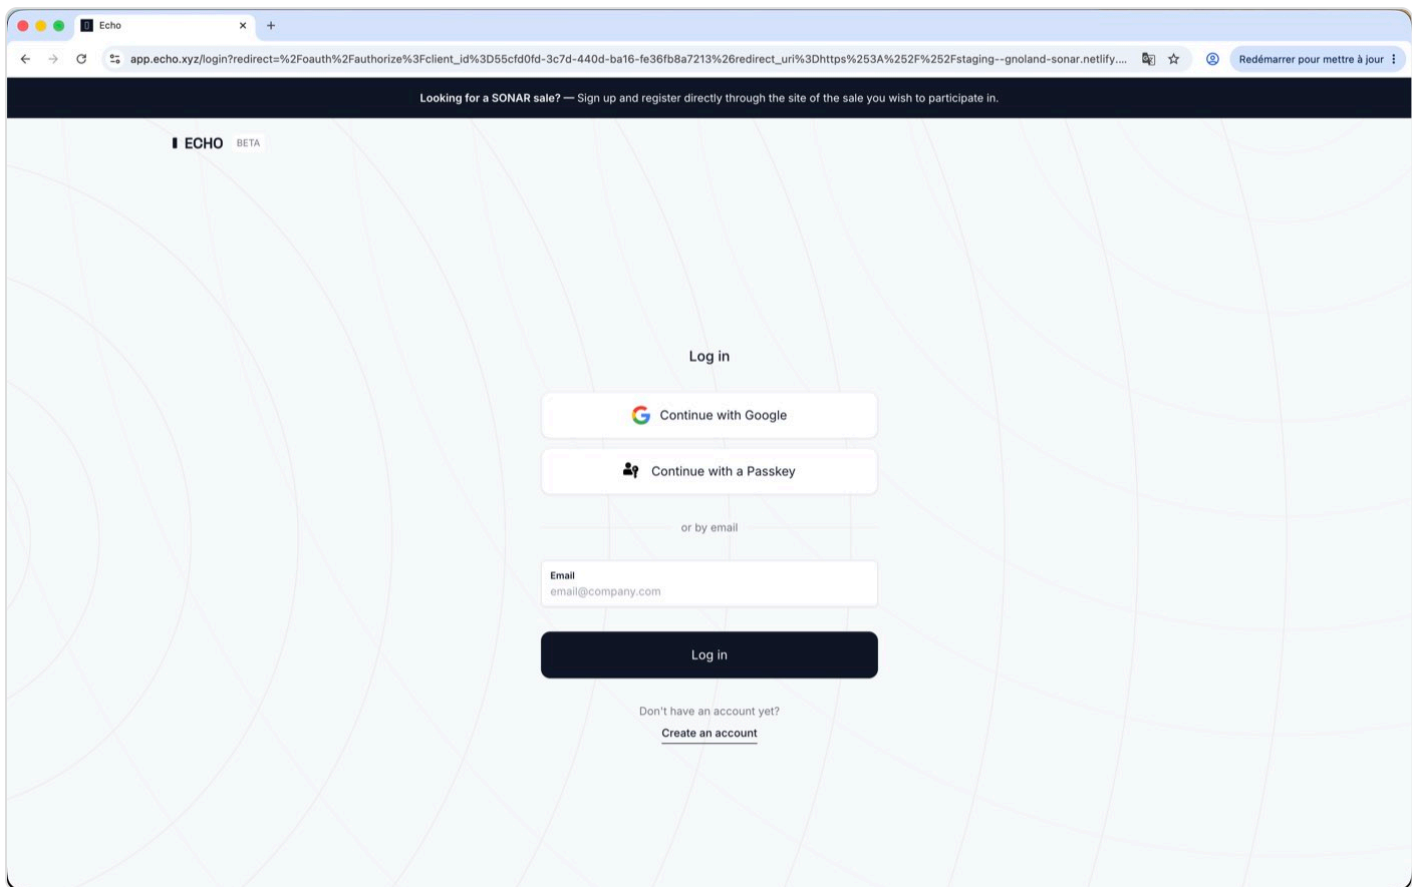

2 Start the verification

The panel expands on step **1 VERIFY**. Click **VERIFY WITH SONAR**. You will be redirected to Echo's site (Sonar is Echo's compliance service).

3 Log in or create an Echo account

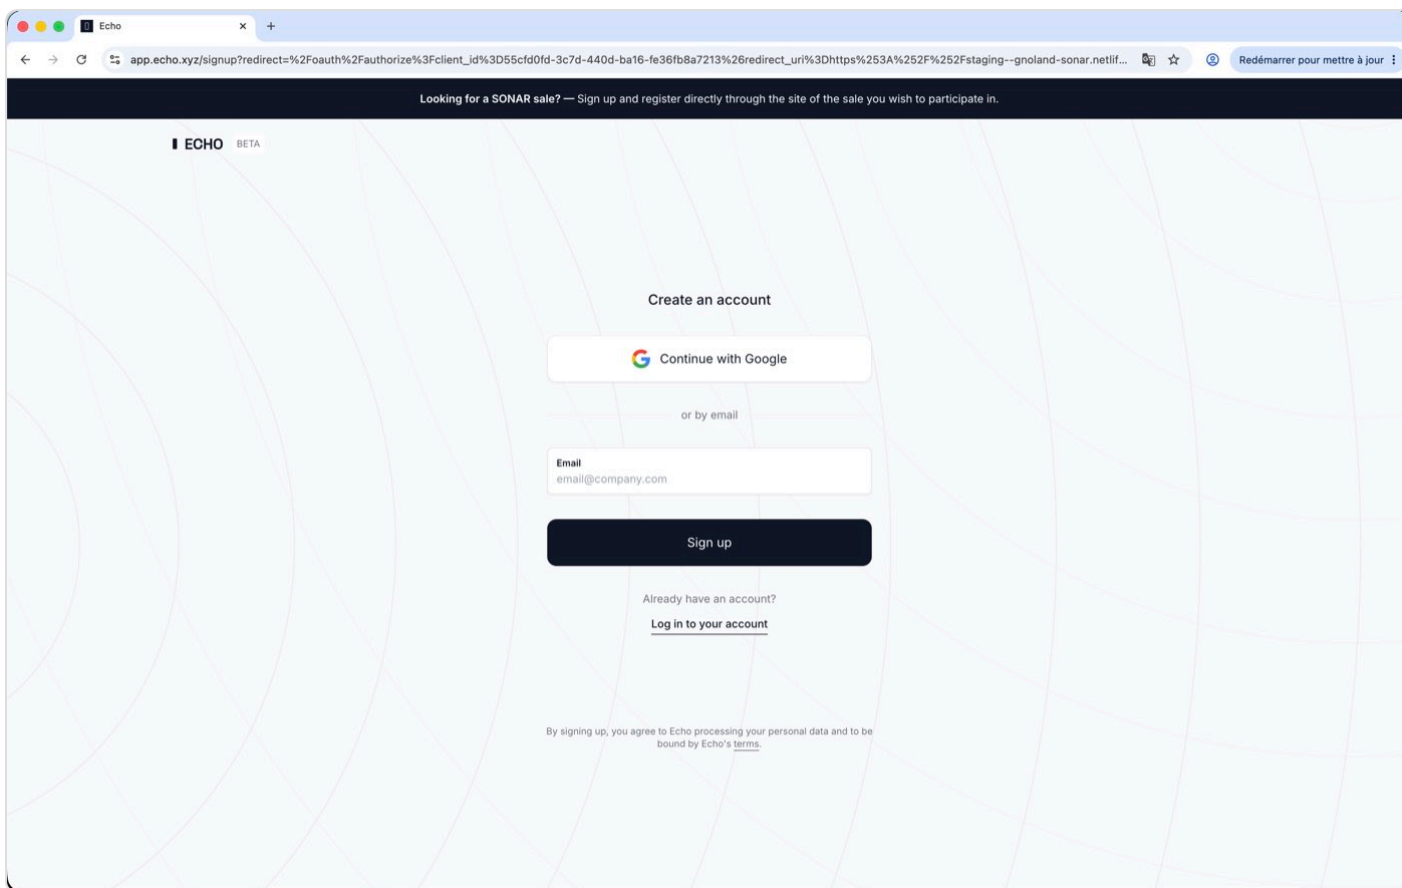

You land on `app.echo.xyz` . If you already have an Echo/Sonar account, log in (Google, Passkey or email). If not, click **Create an account** at the bottom.

The screenshot shows a web browser window with the URL `app.echo.xyz/login?redirect=%2Foauth%2Fauthorize%3Fclient_id%3D55cfd0fd-3c7d-440d-ba16-fe36fb8a7213%26redirect_uri%3Dhttps%253A%252F%252Fstaging--gnoland-sonar.netlify....`. The page has a dark blue header with the text "Looking for a SONAR sale? — Sign up and register directly through the site of the sale you wish to participate in." Below the header, the "ECHO BETA" logo is in the top left. The main content area has a light blue background with a subtle grid pattern. In the center, there is a "Log in" section. It includes two buttons: "Continue with Google" (with the Google logo) and "Continue with a Passkey" (with a person icon). Below these is the text "or by email". There is an input field labeled "Email" with the placeholder text "email@company.com". Below the input field is a dark blue "Log in" button. At the bottom of the login section, there is a link that says "Don't have an account yet? [Create an account](#)".

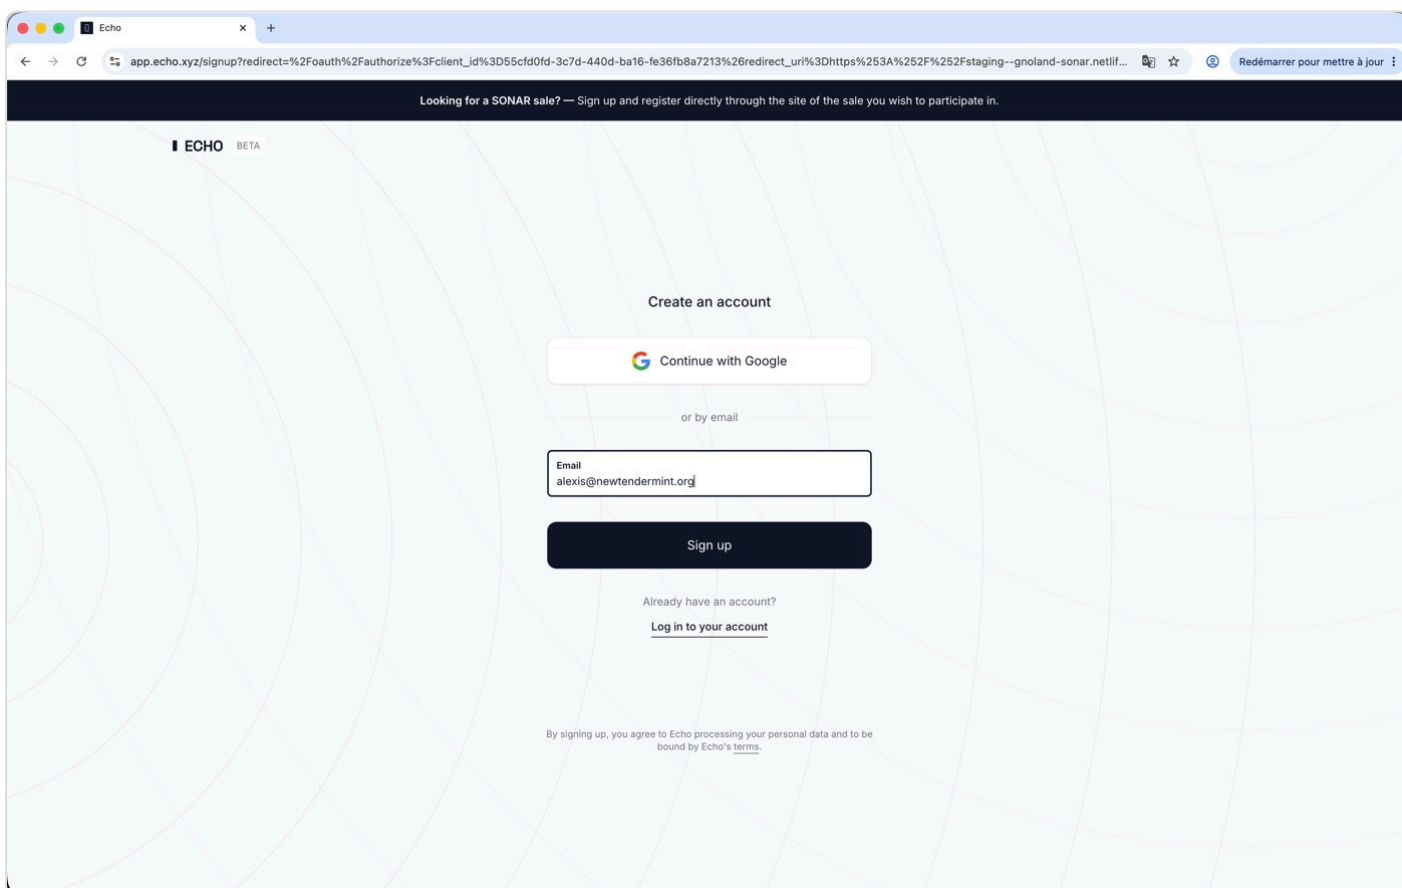

4 Sign up with your email

Enter your email address (or use **Continue with Google**) and click **Sign up**. Echo will send you a verification code or link - check your inbox and follow it.

The screenshot shows a web browser window with the URL `app.echo.xyz/signup?redirect=%2Foauth%2Fauthorize%3Fclient_id%3D55cfd0fd-3c7d-440d-ba16-fe36fb8a7213%26redirect_uri%3Dhttps%253A%252F%252Fstaging--gnoland-sonar.netlify...&utm_source=google`. The page has a dark blue header with the text "Looking for a SONAR sale? — Sign up and register directly through the site of the sale you wish to participate in." Below the header, the "ECHO BETA" logo is in the top left. The main content area has a light blue background with a subtle grid pattern. In the center, there is a "Create an account" section. It features a "Continue with Google" button with the Google logo. Below this, it says "or by email". There is an "Email" input field with the placeholder text "email@company.com". Below the input field is a dark blue "Sign up" button. Underneath the button, it says "Already have an account?" followed by a link "Log in to your account". At the bottom, there is a small line of text: "By signing up, you agree to Echo processing your personal data and to be bound by Echo's [terms](#)."

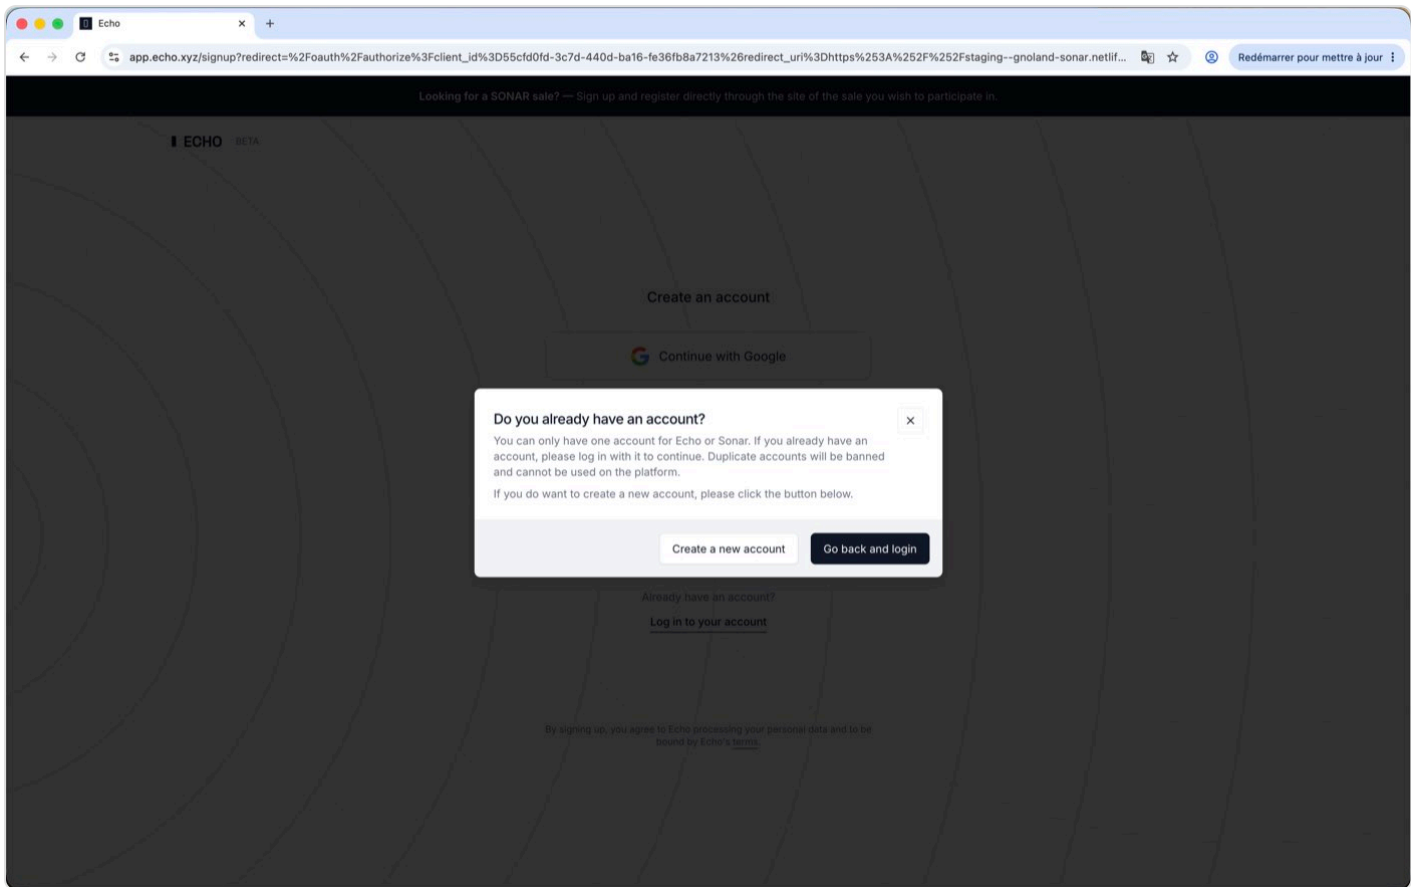

Example with a work email:

This screenshot is identical to the one above, showing the same Echo sign-up page. The only difference is the email address entered in the input field, which is now "alexis@newtendermint.org". All other elements, including the header, logo, buttons, and text, remain the same.

5 One account per person

If this popup appears, click **Create a new account** ONLY if you truly have no Echo/Sonar account yet. Duplicate accounts get banned by Echo. If in doubt, click **Go back and login**.

6 Authorize the sale site

Sonar now asks you to authorize **All in Bits Inc. Sale** to read your verification data. The yellow banner "This is a test sale" is expected - it confirms you are on the sandbox. Scroll down and click **Authorize**.

SONAR
by ECHO

on behalf of

This is a test sale

This sale has been created solely for testing the external client integration with the Sonar API.

Please note that this sale might not be a legitimate one if you landed here with the intention of participating in the sale. Please proceed with caution.

Do you authorize All in Bits Inc. Sale to connect with your Sonar data

Required data

- ✓ Confirmation that you meet eligibility requirements
- ✓ Names and region of entities you control

By default, All in Bits Inc. Sale **will not** receive your

- ✗ Email
- ✗ Legal name
- ✗ IDs or any documents submitted
- ✗ Financial information
- ✗ Echo investment history

Do you authorize All in Bits Inc. Sale to connect with your Sonar data

Required data

- ✓ Confirmation that you meet eligibility requirements
- ✓ Names and region of entities you control

By default, All in Bits Inc. Sale **will not** receive your

- ✗ Email
- ✗ Legal name
- ✗ IDs or any documents submitted
- ✗ Financial information
- ✗ Echo investment history

However, note that All in Bits Inc. Sale may request this or other account information only for legal, regulatory or tax purposes.

By clicking "Authorize" you authorize Sonar to share the Personal Data linked to your Sonar Account with this third party.

By default, under the Sonar API, this third party will not be granted access to your Personal Data.

However, by clicking Authorize, you authorize Sonar to disclose Personal Data that you have provided to Sonar to this third party, but only to the extent necessary for the third party to comply with its legal, regulatory or tax obligations after making a written request to Sonar and evidencing those obligations.

For details on how this third party will process Personal Data, please see their Privacy Notice and Terms of Service. You can update your third party app permissions at any time in your Sonar Account.

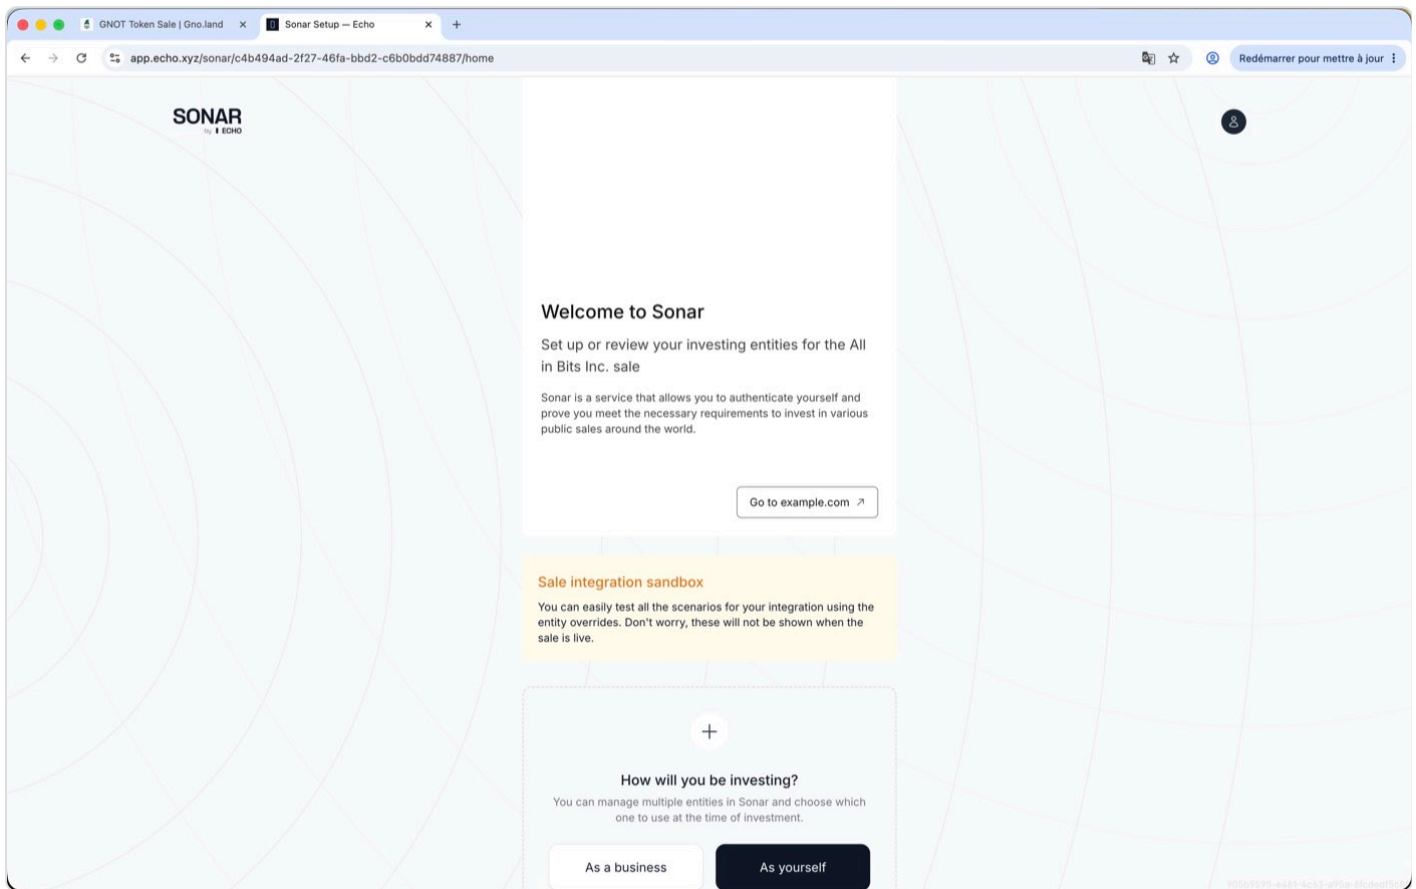

By accessing or using any of the Sonar services, including log in with Sonar, you agree to Sonar processing your personal data and accept Sonar's terms and privacy notice.

7 Set up your investing entity on Sonar

After authorizing, open the Sonar setup page for our sale (if it did not open automatically):

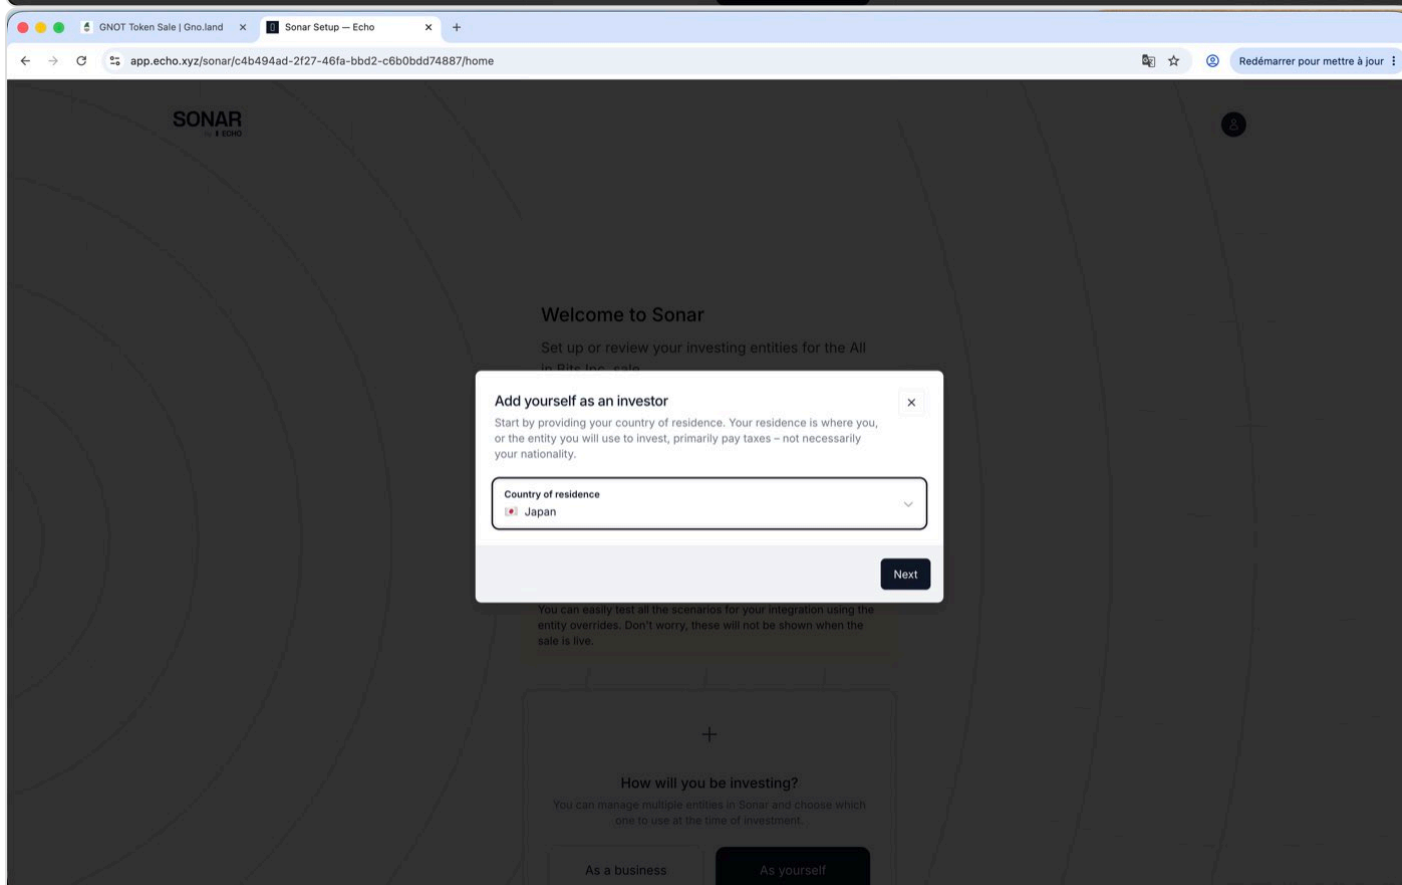

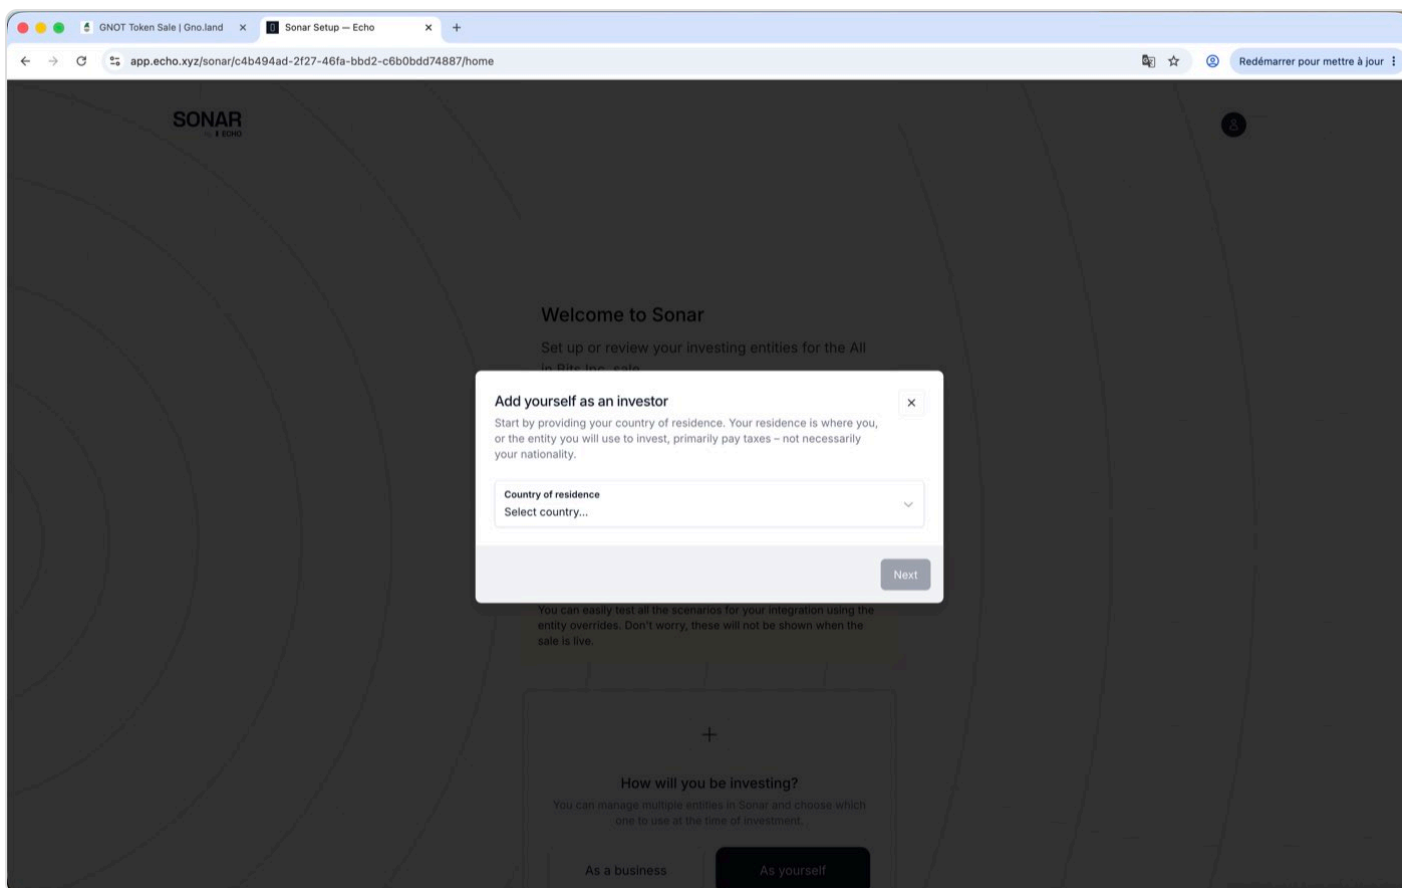

<https://app.echo.xyz/sonar/c4b494ad-2f27-46fa-bbd2-c6b0bdd74887/home>

You should see "Welcome to Sonar" and the yellow **Sale integration sandbox** banner. Under "How will you be investing?", click **As yourself**.

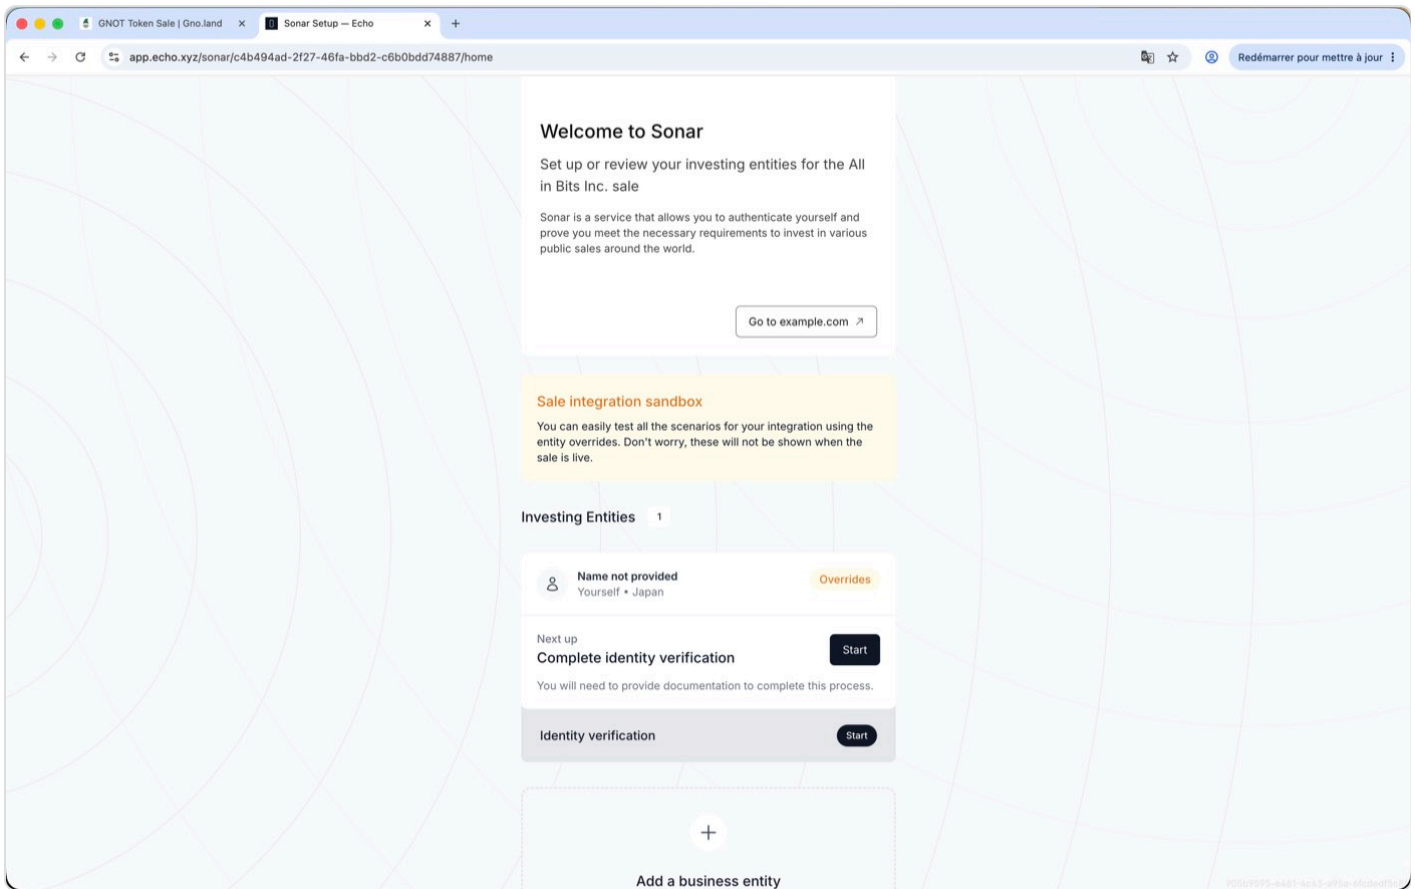

8 Pick a country of residence

In the "Add yourself as an investor" modal, select any **Country of residence** (it is a sandbox - the value does not matter for testing) and click **Next**.

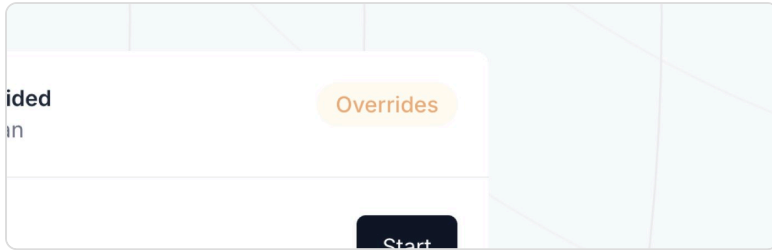

9 Your entity is created - do NOT start the real KYC

Your entity now appears under **Investing Entities** ("Name not provided - Yourself"). Ignore the **Start** buttons for "Complete identity verification": that is the real KYC flow and it is not needed on the sandbox.

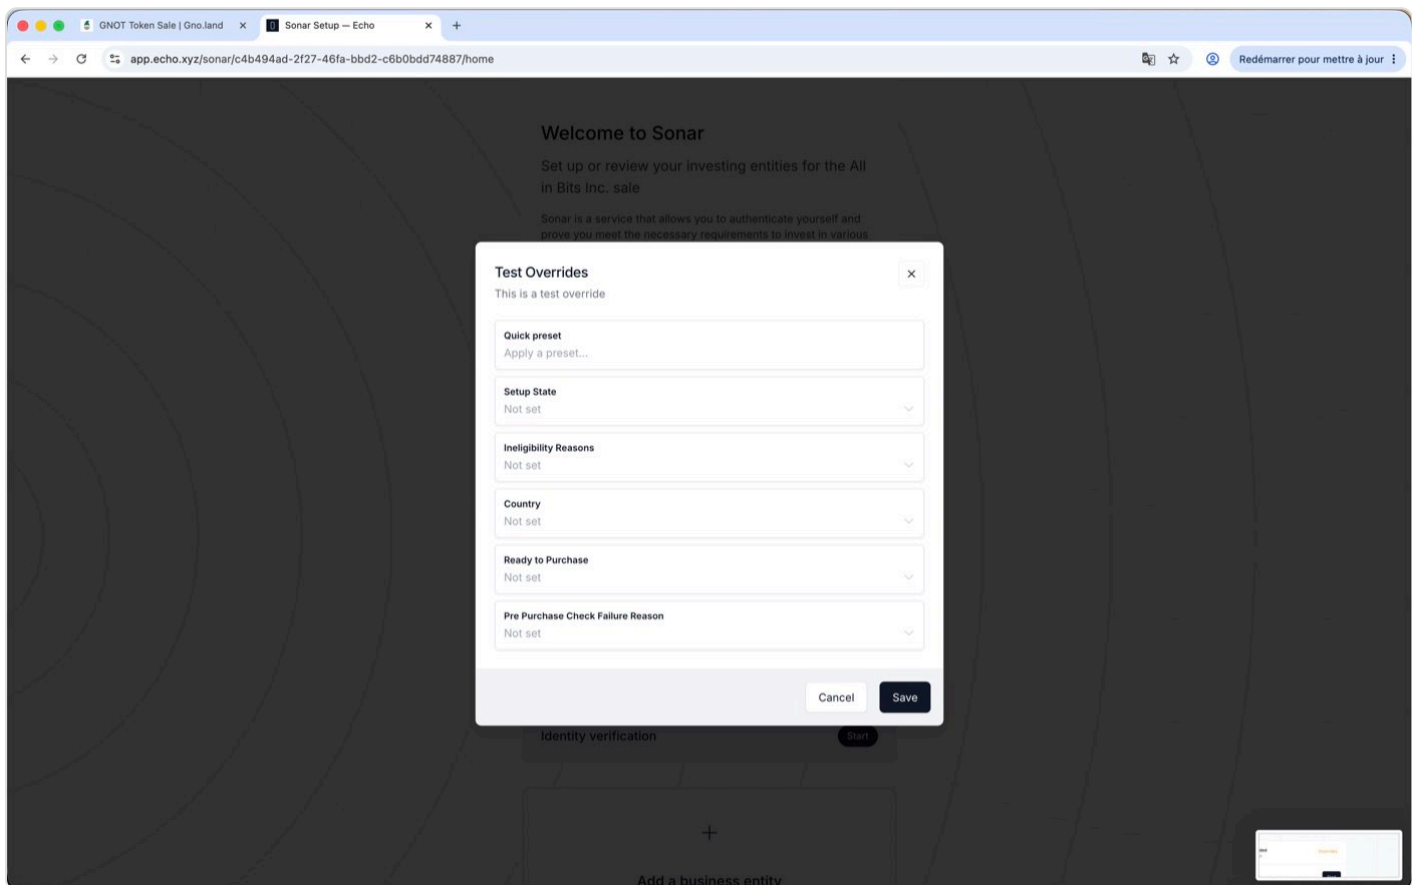

10 Open the Overrides panel

On your entity card, click the orange **Overrides** chip (top right of the card). This panel only exists on test sales.

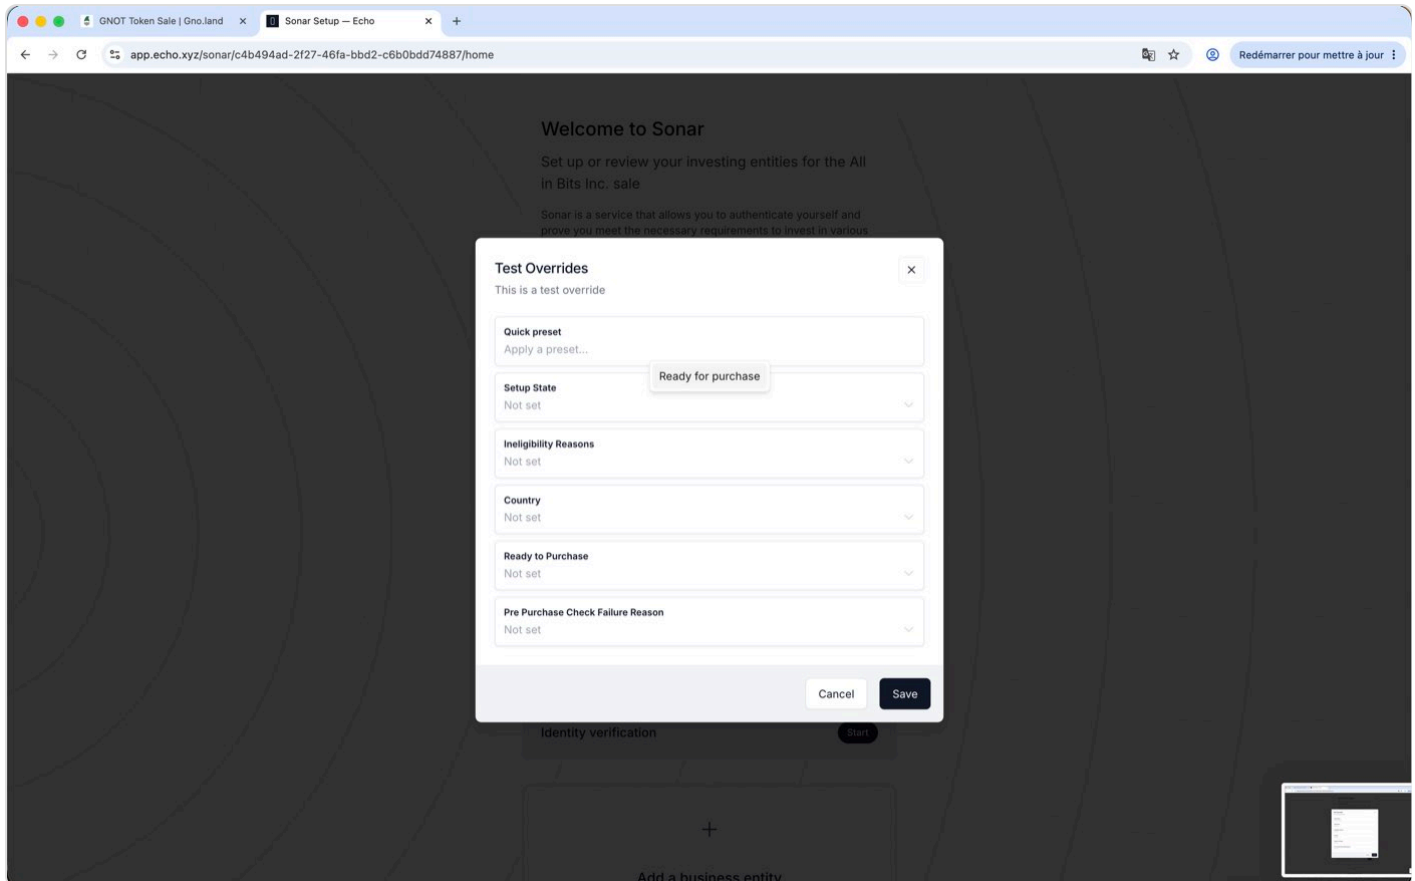

11 Apply the "Ready for purchase" preset

In the **Test Overrides** modal, open **Quick preset**, choose **Ready for purchase**, then click **Save**. This marks your entity as fully verified and eligible in one go (it may also set the country to United States - that is fine).

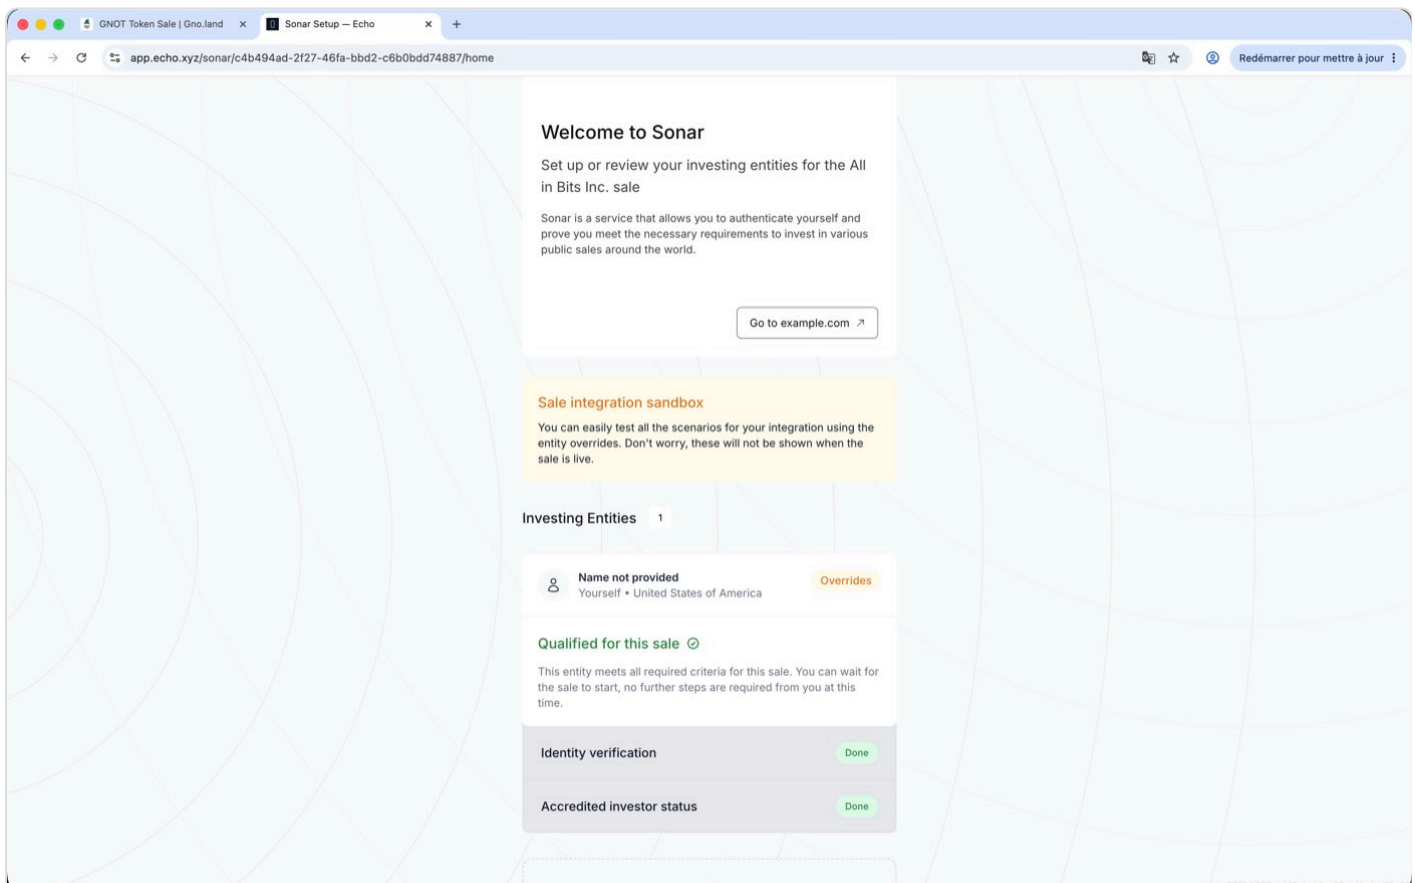

12 Check the result

The preset options look like this when applied:

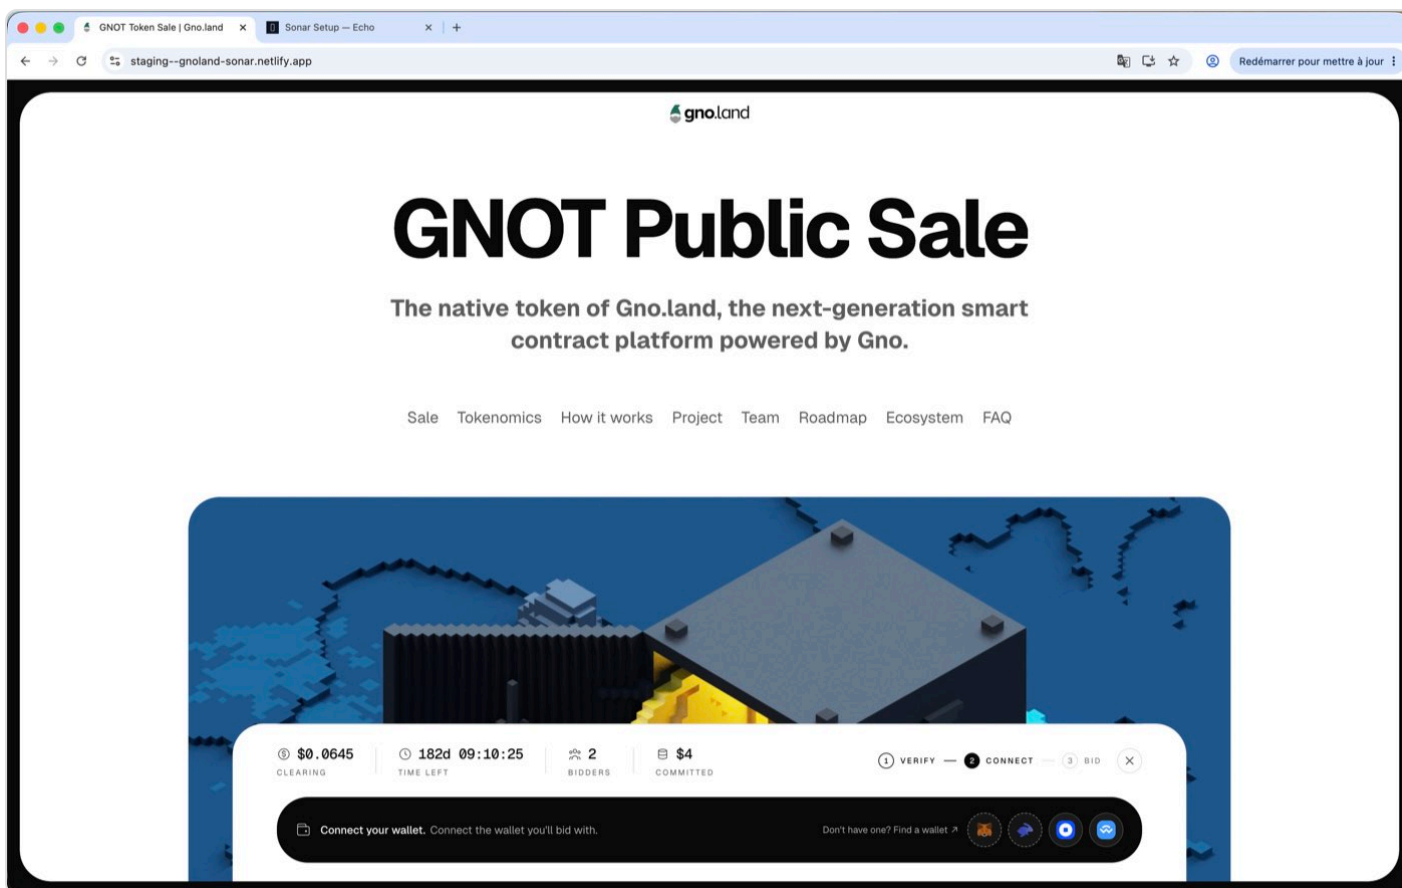

Your entity card should now read **Qualified for this sale**, with "Identity verification - Done" and "Accredited investor status - Done".

13 Back to the sale site - you are verified

Return to the staging tab and **reload the page** (Cmd+R; hard refresh Cmd+Shift+R if needed). The bar should now be on step 2 **CONNECT**: "Connect your wallet". From here, connect **MetaMask** on **Sepolia** to place a test bid.

! Troubleshooting

- **The site shows "Welcome back / Reconnect" right after you come back from Sonar:** known issue - Sonar's state can take a moment to propagate. Wait ~30 seconds and reload; if it persists, click Reconnect once (it re-authenticates without redoing anything). A fix is being deployed.
- **"Verification failed / Contact support":** your entity is in a failed state on Sonar. Open the Overrides panel (steps 10-11) and apply the "Ready for purchase" preset, then reload the sale site.
- **The Sonar page says "verification failed" right after Authorize:** same fix - you skipped the entity setup; do steps 7 to 12.
- **Bidding fails with Keplr:** use MetaMask. Keplr ignores the gas limit our dapp requests and the transaction runs out of gas.
